

## **BUZZI FOUNDATION**

### AMPLIFON FOUNDATION PARTNER CIVIL SOCIETY

There are only thirteen children's hospitals in Italy: too few, although it is with pride that we note that the real star of this small universe is Milan and the Vittore Buzzi Children's Hospital.

It is a full-colour hospital where doctors, nurses and volunteers work together with a serene, technologically advanced reception facility that accompanies children from birth to the paths of healing and where parents feel personally involved along this path. One big family that stays in the hearts of our patients all their lives.

Many people have already supported the Children's Hospital dream with their resources and talent. Yet it is not enough. For anyone who feels the need, the time has come to give. To give a better future.
