

OBIETTIVO3

AMPLIFON FOUNDATION PARTNER

CIVIL SOCIETY - PEOPLE

Obiettivo3 is a sports club that wants to be a centre for listening to sport in disabilities; to support athletes by providing them with experience, financial support, but above all to seek together a common vision to establish objectives in the chosen discipline.

The company was created one evening, before the 2016 Rio Paralympics, when Alex Zanardi was thinking back to his history, his competitive career and realised once again how life has put him to the test, but also how it has given him many opportunities that unfortunately not everyone has.

It is from the desire to share, to be reborn, to be able to make others feel the same emotions that he was born in him the desire to give an opportunity and to support those who would like to approach the sport but cannot.
